PROFESSIONAL SUMMARY

Results-driven Software Engineer specializing in building high-performance, scalable web applications. Proficient in Next.js, JavaScript, Python, and Django with hands-on expertise in GraphQL API development, CRM integrations, and enterprise portal operations. Passionate about writing clean, efficient code and delivering seamless user experiences — from pixel-perfect frontends to robust backend systems.

EXPERIENCE

Software Engineer – Frontend Developer | Coneio Exim Pvt Ltd, Hyderabad | May 2025 – Present

- Built and maintained a B2B e-commerce platform using Saleor 3.0 and GraphQL, delivering scalable product management features for business clients.
- Extended GraphQL API and customized Saleor admin dashboard to add product and variant ratings, improving platform analytics and customer trust.
- Integrated Microsoft Dynamics 365 CRM to automate lead capture, synchronize user sign-ups, and streamline customer data management.
- Managed CI/CD deployments to live production environments, ensuring zero-downtime releases and consistent platform stability.

Backend Operations Associate | Samsung Service Center, Azamgarh | Jan 2024 – Apr 2025

- Operated Samsung's GSPN (Global Service Partner Network) portal daily to manage complete service center workflows including stock intake, parts allocation, and repair job creation.
- Raised and updated repair job cards on GSPN for every incoming device, accurately mapping each used part to its corresponding repair order to maintain precise inventory records.
- Tracked inbound and outbound parts movement through the GSPN portal, performing regular stock reconciliation to ensure inventory accuracy and minimize discrepancies.
- Ensured full compliance with Samsung's service center SOPs by executing all operations — from parts requests to job closure — through the GSPN portal system.

Web Developer Associate | Mahira Technology (Intern), Pune | Nov 2022 – Apr 2023

- Developed and maintained user-facing features using HTML, CSS, and JavaScript, collaborating with backend developers to integrate UI with REST APIs.
- Diagnosed and resolved bugs, UI inconsistencies, and performance bottlenecks to ensure a responsive cross-browser user experience.
- Shipped iterative code changes to production, maintaining website stability and uptime throughout deployment cycles.

PROJECTS

JobNest – Full Stack Job Board | Next.js, Tailwind CSS, Python, Django, JWT, REST API

- Implemented JWT-based authentication with role-based access control (RBAC) for Employers and Candidates.
- Built dynamic dashboards: Employers manage listings and view applicants; Candidates apply and track application status in real time.
- Secured API endpoints with token-header authentication and local storage for session management.

DevFinder – GitHub Profile Explorer | Next.js, JavaScript, GitHub REST API, Tailwind CSS, SSR

- Built a GitHub user search app with Next.js dynamic routing, fetching profiles, repos, and followers via GitHub REST API.
- Used server-side rendering (SSR) for fast page loads and better SEO; responsive UI built with Tailwind CSS.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3

Frameworks & Libraries: Next.js, React, Django, Tailwind CSS

APIs & Platforms: GraphQL, REST API, JWT Auth, Microsoft Dynamics 365 CRM, Samsung GSPN Portal

Tools & Cloud: Git, GitHub, AWS, Docker

Concepts: CI/CD, Server-Side Rendering (SSR), Role-Based Access Control (RBAC), Inventory Management, Responsive Design

EDUCATION

B.Tech in Computer Science & Engineering | Integral University, Lucknow | 2018 – 2022 | CGPA: 8.9 / 10

CERTIFICATIONS

Complete Web Design Course – Udemy | **AWS Services Fundamentals** – Simplilearn | **Docker for Beginners** – KodeKloud
